

EL MAHDI MOUBARAK

Founder & Full-Stack Engineer · Software, SaaS & AI

📍 France · ✉ elmahdi@moubarak.dev · **in** [LinkedIn](#) ·  [GitHub](#)

PROFILE

I build software and AI systems end-to-end: specs, architecture, code, deploy. 6 years across cybersecurity, healthcare and fintech, mostly as the only engineer on the project. I work with founders and agencies who need something built properly and shipped fast.

PROFESSIONAL EXPERIENCE

Founder & Software Engineer

EMM — France

March 2026 – Present

- Independent software engineering practice: web apps, SaaS and AI automation for founders and agencies, end to end
- Delivered corporate AI training for DRIVECO (two tailored FR/EN sessions with live use cases)

Founder

Piktechs

March 2026 – Present

- B2B SaaS for events & networking: digital business cards, lead capture, attendee tracking (Next.js, TypeScript, Supabase)
- Design, build and run the whole product: architecture, frontend, backend, infrastructure

CTO

KSUR Services — France · Morocco

March 2026 – Present

- Own the agency's full technical stack and delivery, from architecture to production
- Build tailored web & mobile applications and AI-powered automation workflows for clients

Full-Stack Engineer

Board of Cyber — Paris (remote)

March 2023 – February 2026

- Core contributor to *Security Rating®*, a SaaS cyber-rating platform used by 200+ organizations (Angular, TypeScript, Python)
- Solved 700+ tickets across platform, back office and manager office in a high-cadence release cycle
- Engineered a Python-based nmap vulnerability scanning probe automating attack surface data collection
- Contributed to Angular migration, test coverage (Spectator) and CI/CD optimization

Full-Stack Engineer

ALTAO Santé — Lille

Sept. 2021 – Sept. 2022

- Sole engineer on a greenfield medical platform for hospital discharge summary correction (Vue.js, Django, PostgreSQL)
- Processed 5,000+ documents through the platform, saving hospitals €700,000
- Ran requirement sessions directly with doctors, wrote specs, integrated ML algorithms from the Data Science team
- Deployed and monitored the full AWS infrastructure autonomously (EC2, Route53, Amplify)

Mobile Software Engineer

Deuspi — Lille

March 2021 – June 2021

- Sole mobile engineer on the first version of a React Native grocery delivery app
- Owned the full frontend from designer wireframes to production-ready interface

Full-Stack Engineer

Worldline — Seclin

April 2019 – August 2019

- Built an internal R&D debugging tool (Vue.js, Spring Boot, MQTT) improving team development speed by 70%

KEY PROJECTS

 Piktechs	B2B NFC cards & event SaaS (Next.js, TypeScript, Supabase, Stripe)
 PDFold	AI OCR + Vision pipeline converting PDFs to structured Markdown, 11 languages (Next.js, Gemini API, Stripe)
 Text-to-Short-Video	AI video generation pipeline (GPT, ElevenLabs, FFmpeg)
 Shopify Store	E-commerce store built and operated end to end, real revenue

SKILLS

Web & Mobile Dev	TypeScript, JavaScript · Next.js, React, React Native · Angular, Vue.js · Python, Django, Flask · PostgreSQL, Supabase
Cloud & DevOps	AWS (EC2, Route53, Amplify) · Docker, Git, CI/CD · Vercel
AI & Automation	AI Agents, Agentic Dev · LLM APIs, Local LLMs · RAG, Vectorization · OCR & Vision pipelines · ElevenLabs, Voice AI
E-commerce	Shopify API, Liquid · Stripe · SEO
Languages	🇫🇷 French (Native) · 🌐 English (C1) · 🇪🇸 Spanish

EDUCATION

IMT Nord Europe <i>Lille — 2017 – 2022</i>	Engineering Degree in CS, Networks & Telecoms
Lycée Français Louis-Massignon <i>Casablanca — 2017</i>	Scientific Baccalaureate, Math Major

AVAILABILITY

Available for: freelance missions · SaaS & AI development · automation · tech consulting
